

Health, Safety and Environment

Introduction

Training

Health, Safety & Environment

Health, Safety and Environment

What does health, safety and environment mean?

Health, Safety & Environment

Health, Safety and Environment at Work

It means ...

- working in a safe and healthy place
- a low risk of accidents and injuries
- protecting our environment

Health, Safety & Environment

Why is Health, Safety and Environment Important?

Health, Safety & Environment

Health, Safety and Environment is important to ...

- ensure our health and safety at work
- control dangerous activities
- allow us to work safely
- comply with the law

Health, Safety & Environment

Who is responsible for Health, Safety and Environment?

Health, Safety & Environment

Our Company is responsible for us

For the ...

- environment we work in
- equipment we use
- work that we do

Health, Safety & Environment

We are also Responsible

We must ...

- follow safety rules
- look after ourselves
- not put anyone at risk

Why?

To prevent accidents which can result in
personal injury and damage

Health, Safety & Environment

Cause of Accidents

People cause accidents through ...

- poor knowledge and understanding
- not taking enough care
- not following safety rules

Health, Safety & Environment

Preventing Accidents

To prevent accidents, we must ...

- know how to work safely
- read safety information and instructions carefully

GUIDANCE
Only use this equipment if you have been trained

Ask your staff in charge for help and advice

Health, Safety & Environment

Preventing Personal Injury

We may be provided with personal protection

Ensure it is ...

- always used
- correctly worn
- cleaned and replaced when needed

Remember,
it is provided for our protection and safety

Health, Safety & Environment

Reporting Accidents

We must ...

- report all accidents to our staff in charge
- complete an Incident Form

Why?

To allow an investigation and prevent it happening again

Health, Safety & Environment

First Aid

If we suffer any injury at work

Ensure ...

- you know how and where to get help
- details of the injury and treatment are recorded

Health, Safety & Environment

Fire Safety

To keep us all safe, we must ...

- know and understand our fire procedures
- keep all fire exits and escape routes clear
- take part in fire training and drills

Health, Safety & Environment

Manual Handling

Handling and moving loads can cause injury

To prevent this, we must ...

- think before we lift
- wear the correct clothing
- plan our route
- lift correctly

Health, Safety & Environment

Work Equipment

Equipment we use can be dangerous

Ensure you ...

- have been trained to use it
- know how to use it safely
- know how to turn it off quickly

GUIDANCE
Only use this equipment if you have been trained

Health, Safety & Environment

In Conclusion

Always remember ...

- health, safety and environment is everyone's business
- if you need help - ask

Think Safe - Act Safe - Be Safe
